About DGC

DGC undertakes consultancy and development assignments relating to energy and the environment with a focus on biogas, natural gas and other gases.

DGC's mission is to put knowledge into action and to actively participate in the development of a green energy system with a high degree of security of supply.

We aim to facilitate the integration of gas with other forms of energy, to draw attention to the significance of the gas system for the Danish energy supply, and to promote safety, environmental issues and energy efficiency.
